Accounts and book keeping made easy...

How?

Ensuring your accounts are accurately recorded, and kept up to date, is often a task that gets left behind. Catching up, months down the line, is an even greater challenge.

If you need accurate accounts provided on time, we're here to help manage your childcare setting with an full online accounts package.

Our package will:

- Assist with invoicing, collection of fees and producing customer statements
- Assist with making payments, monitoring expenditure and reconciling your bank statements
- Prepare accounts to help in completion of self-assessment tax returns
- Produce financial statements to file at Companies House and abbreviated accounts to ensure the minimum amount of your financial information is made public.

We work to prepare your accounts to agreed timescales and deadlines.

Our value added services include:

- Budgeting and forecasting
- Identifying areas for minimising tax liabilities
- Pointing out areas with the most opportunity to make improvements
- Measuring performance against goals, with advice on where to focus.

We take the time to explain your accounts to you so that you understand what is going on financially within your business, helping you to plan for the future.
